Summary

Software engineering master's student with 5 years of Flutter expertise and specialization in computer vision and full-stack development. Led award-winning projects, including national programming competitions, with strong skills in AI, public speaking, and leadership. Fluent in multiple languages and eager to learn new technologies.

Education

Master's in Computer Vision (Informatique Visuelle)

Expected July 2026

University of Science and Technology Houari Boumediene, Algiers, Algeria

- Relevant Coursework: Computer Vision, Machine Learning, Image Processing

Bachelor's in Software Engineering

June 2024

University of Science and Technology Houari Boumediene, Algiers, Algeria

- Specialized in Software Engineering (ISIL) after first year in Computer Science and Mathematics
- Relevant Coursework: Web Development, Mobile App Development, Artificial Intelligence

Experience

Freelance Software Developer

June 2023 – Present

Algiers, Algeria

- Worked as a freelancer for two years, developing software solutions using mobile and web technologies.
- Collaborated with clients to deliver customized applications, enhancing functionality and user experience.

Projects

Heart Disease Detection Using Bull's Eye Ultrasound

Bachelor's Thesis

- Pioneered application of computer vision and AI to detect heart diseases and heart attacks using novel "Bull's Eye" ultrasound imaging technology.
- Technologies: Python, OpenCV, TensorFlow.
- Outcome: First team to apply computer vision to Bull's Eye ultrasound, completed as bachelor's thesis.

Student Project Incubation Platform

1st Place - Coding Masterr

- Built a multiplatform solution to transform student projects into startups, using Flutter, Next.js, and Express.js.
- Integrated AI modules for project summarization and classification based on type and feasibility.
- Won 1st place among 76 competitors from 21 universities at the National University Programming Competition, Algeria.

Hackathon Simulation 2D Game

1st Place - GDG Hackathon

- Developed a 2D game simulating a hackathon experience, using Flutter and Firebase for real-time features.

- Technologies: Flutter, Firebase, Dart.
- Won 1st place at GDG Algiers Hackathon, recognized for innovative design and functionality.

Taskmates: Collaborative To-Do List App

Productivity App

- Created a Flutter app for team-based task management, enabling shared to-do lists and progress tracking.
- Technologies: Flutter, Dart, Firebase.
- Outcome: Enhanced team productivity for group projects and collaborative workflows.

Skills

Programming Languages

Python, JavaScript, Dart, Java

Frameworks & Tools

Flutter (5 years), Next.js, Express.js, Firebase, OpenCV, TensorFlow, Git, Laravel

Other Technical Skills

UI/UX Design, Design Patterns, Software Architectures, Competitive Programming, Game Development, 3D Design

Soft Skills

Teamwork, Problem-Solving, Communication, Public Speaking, Leadership, Willing to Learn

Languages

- Arabic: Native
- English: Advanced (C1/C2)
- French: Upper-Intermediate (B2)

Awards

- 1st Place, National University Programming Competition, Algeria
- 1st Place, GDG Algiers Hackathon
- Featured on Algerian Radio for National Competition

Activities

- participating in multiple hackathons and events and competitions around the country with multiple clubs
- Active member of university tech clubs, contributing to programming and tech initiatives
